

To the FCC re: NAB Petition 04-160, That the NAB would take issue with XM Satellite radio's offering of traffic and weather information does not surprise me in the least. That you would actually give this petition and complaint serious consideration is very disturbing.

Why in the world would you wish to limit valuable, useful information flow rather than increase it and make it more accessible? The NAB simply wishes to stifle competition. Plain and simple.

Of course, I'm sure you already know this. Please! Do the right thing and do not restrict my ability to listen to instant traffic and weather. I can't think of information which is more immediately useful for both me as an individual and and my community.

Thank you for your consideration.

Kenneth Krasne
